ENERGY STAR SCORE

The ENERGY STAR Score is a measure of how well your property is performing relative to similar properties, when normalized for climate and operational characteristics. A 1-100 scale is used so that 1 represents the worst performing buildings and 100 represents the best performing buildings. A score may not be available for certain properties because of use type or insufficient information; Energy Star Portfolio Manager provides a list of [Eligible Property Types](#). Garages are not eligible property types, which is why the Town of Hillsdale's Garage does not have a score listed below.
